Professional Profile

Full-Stack Developer with experience across the entire Software Development Life Cycle (SDLC), from requirements analysis and system design to deployment and production maintenance. Specialized in TypeScript, JavaScript, and Python, with strong proficiency in modern frameworks such as Next.js, React, Django, and Flask. Adept at building end-to-end web applications with a strong focus on scalability, maintainability, and performance. Recognized for rapid learning, autonomy, and adaptability to new technologies and development environments.

Experience

Full-Stack Developer – Self Employed

2025 – 2026

- Development and deployment of websites, delivering stable, production-ready solutions that enhanced clients' digital presence.
- Design and implementation of modern user interfaces, ensuring and improving usability, accessibility, and cross-device interactivity.
- Performance optimization and SEO improvements, reducing load times and increasing potential for organic traffic.

Projects

Chess Game – Player vs Bot

Demo: <https://chess-game-gtg.vercel.app/>

In this chess game, players compete against CPU-controlled opponents—bots powered by custom algorithms developed by me.

Built with Next.js, it serves as an experimental project that will form the foundation for a much more sophisticated future version aimed at creating a novel chess engine.
